Welcome to the Buddy family!

Thank you for participating in CareerBuddy - Career Assessment Test by Buddy4Study.

You must have been eagerly waiting for the assessment results. The findings are here. We have analyzed and interpreted your responses to create this report. In the following pages, you will find a detailed explanation of your interests, aptitude and personality profile. We have also recommended the top Career Clusters that match your personality type. Beyond this, we have also shared the pathways of all the relevant Career options that fall under your matched Clusters.

Purpose of the Report

This report gives a detailed explanation of your responses to CareerBuddy - the Career Assessment Test.

- It is meant to help you discover and understand your abilities, personality and interests towards understanding the scope of your professional pathway.
- With this report, you can begin the process of aligning your qualities with your academic and Career objectives.
- It also offers you suggestions for various Career options that match your personal traits and guides you in setting the right goals.
- The purpose of this report is to give you more choices and possibilities to consider, so that you have many paths to explore.

Report Structure

SECTION 1:

Snapshot of the Findings

SECTION 2:

Personality Types - Explanation, Scores, Top Personality Match and Implications

SECTION 3:

Aptitude Strength - Explanation, Scores, Top Aptitude Match and Implications

SECTION 4:

Career Clusters - Career Clusters - Explanation, Scores, Top Career Clusters Match and Career Details

SECTION 5:

Pathway to 200+ Emerging Career Options (Ebook Download)

How to Read the Report?

- The report will give you scores on Personality types, Aptitude and Career Clusters.
- These scores are then used to give you your top matching Personality Type, Aptitude Score and Career Clusters.
- The report also brings you the meaning of these scores and matches your overall approach with possible Career options.
- You can use this information for informed Career planning, while selecting Streams, Courses or Careers.
- The report also gives you pathway details of 200+ Career options for you to understand how to pursue any given Career option.

Explanation of Personality Types

Realist

People with a realistic personality type are practical, down-to-earth, and enjoy working with their hands. They are often skilled in mechanical or physical activities and prefer practical tasks over abstract or theoretical work.

Investigative

Individuals with an investigative personality type are curious, analytical, and enjoy solving complex problems. They have a strong inclination towards scientific and intellectual pursuits and often excel in research, analysis, and exploration.

Artistic

Those with an artistic personality type are creative, expressive, and have a strong appreciation for aesthetics. They are often talented in various forms of art, such as painting, writing, music, or design, and tend to think outside the box when approaching tasks and challenges.

Explanation of Personality Types

Social

People with a social personality type are outgoing, friendly, and enjoy interacting with others. They have strong communication and interpersonal skills and often thrive in roles that involve helping, teaching, or supporting others.

Enterprising

Individuals with an enterprising personality type are ambitious, confident, and enjoy taking charge. They are often natural leaders and excel in roles that involve sales, entrepreneurship, or management.

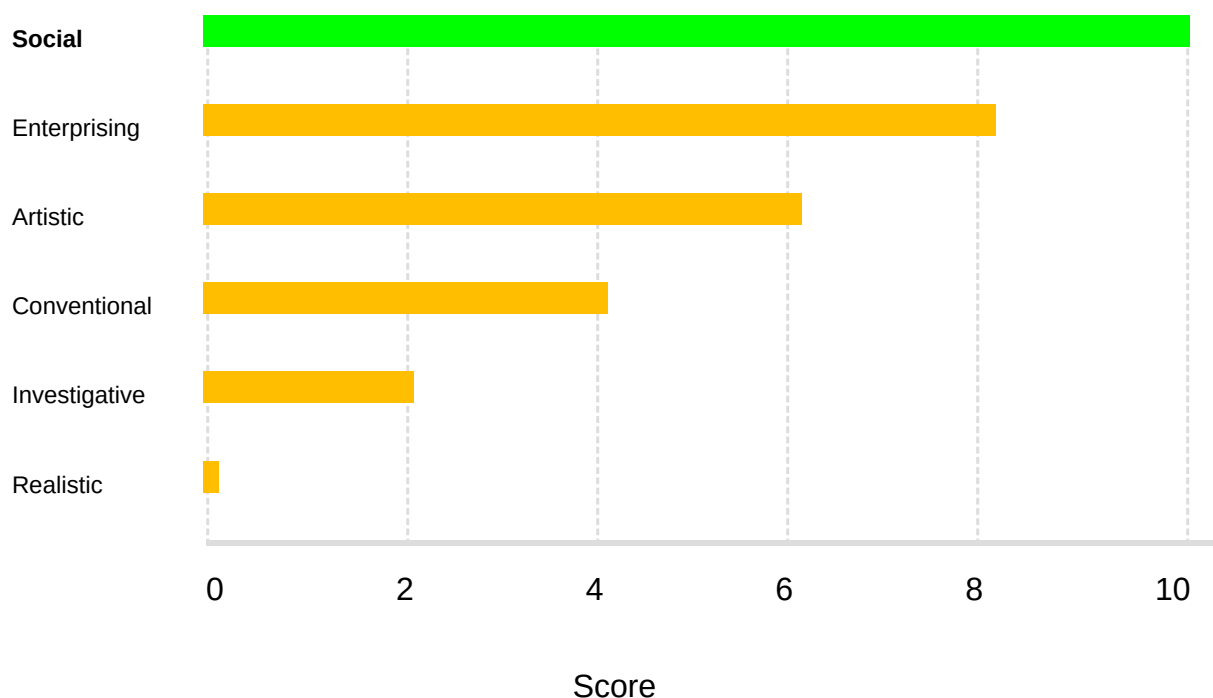

Conventional

Those with a conventional personality type are organized, detail-oriented, and prefer structured environments. They thrive in roles that involve following established procedures, working with data or numbers, and maintaining order and efficiency.

Your Personality Scores and Insights

Personality Types matching to you are:

- 1. Social** - You have strong interpersonal skills and a genuine interest in helping others. You thrive in careers that involve interacting with and supporting people, such as teaching, counseling, or healthcare.
- 2. Enterprising** - You have enterprising traits that reveal a natural ambition and confidence. You are well-suited for leadership roles, entrepreneurship, and careers that involve taking risks and making business decisions.

Personality Types moderately matching to you are:

- 1. Artistic** - You have an interest in creative fields, while also being open to other areas of study or career paths that require a mix of creative and analytical skills.
- 2. Conventional** - You have a balanced approach to structured and unstructured situations. You might consider careers that involve a mix of routine tasks and creative problem-solving.

Explanation of Personality Type

Personality Types which remotely match you are:

1. Investigative - You have less interest in scientific or analytical fields. You might prefer careers that involve more practical or social skills.

2. Realistic - You have less interest in hands-on tasks and a preference for more abstract or theoretical subjects and careers, such as research or academia.

Explanation of Aptitude Types

Numeric Aptitude:

Numeric aptitude indicates ability to work with numbers, perform calculations, and analyze numerical data effectively. It is essential for fields such as finance, accounting, and data analysis.

Verbal Aptitude:

Verbal aptitude refers to skill in language, including reading, writing, and communication. Individuals with high verbal aptitude excel in areas such as writing, public speaking, and language-related professions.

Logical Aptitude:

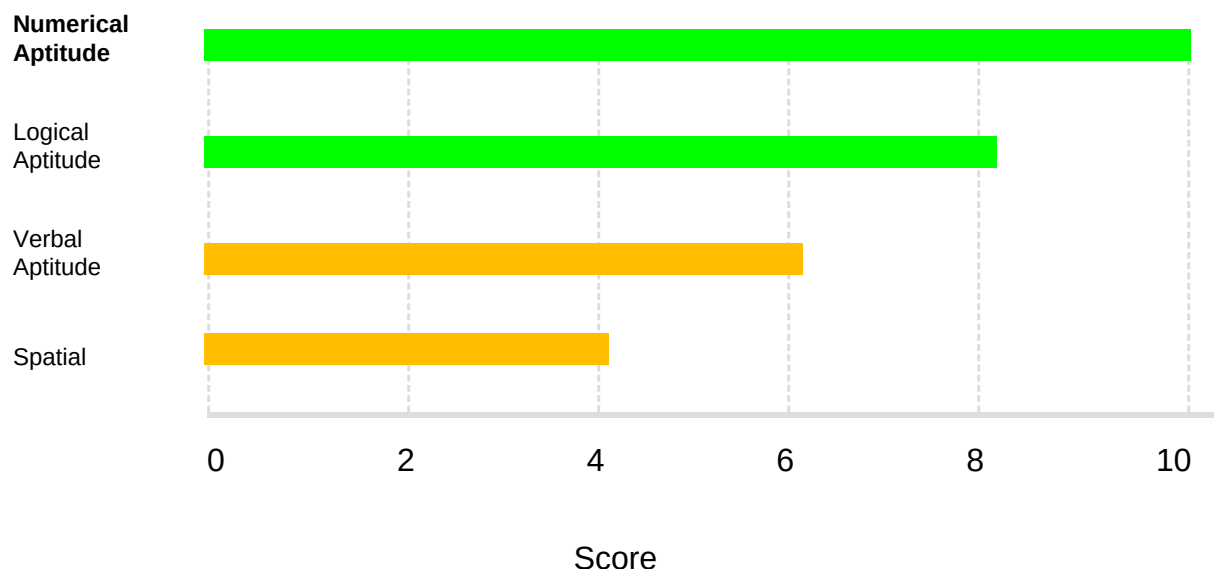

Logical aptitude signifies reasoning and problem-solving skills. Individuals with high logical aptitude excel in fields that require critical thinking, pattern recognition, and logical analysis, such as mathematics, computer programming, and scientific research.

Spatial Aptitude:

Spatial aptitude indicates ability to visualize and manipulate objects in three-dimensional space. It is crucial for fields such as architecture, engineering, and design, where individuals with high spatial aptitude can understand and create complex spatial relationships.

Your Personality Scores and Insights

You have scored highest in the following Aptitudes :

- 1. Numerical Aptitude** - You have strong numerical skills that can lead to success in fields like finance, accounting, or data analysis. You have a natural talent for working with numbers, which opens up various career paths that require these skills.
- 2. Logical Aptitude** - You have strong reasoning and problem-solving skills. You have a natural talent for critical thinking, pattern recognition, and logical analysis, making you well-suited for fields that require these abilities, such as mathematics, computer programming, or scientific research.

You have scored medium in the following Aptitude :

- 1. Verbal Aptitude** - You have a balanced proficiency in language and communication. You can perform well in various fields that require communication and language skills, allowing you to explore a range of career options.

Your Aptitude Score and Insights

You have scored low in the following Aptitude:

1. Spatial - You may face challenges in tasks that require spatial visualization and understanding. However, with dedication and support, you can develop your spatial skills and overcome these challenges. By actively working on improving these abilities, you can broaden your career options and find success in fields that rely less on spatial thinking.

List of Career Clusters

Agriculture, Food and Natural Resources

This Career Cluster is focused on producing, processing, marketing, distributing, financing, and developing agricultural resources. - Good Colour Sense
- Artistic Skills
- Appreciation of Aesthetics
- Ability to Express Ideas Through Drawings
- Detail Oriented

What Can You Become In The Future?

1. **Storyboard artist:** After an idea has been developed and the script or story has been made, all the details are sketched on a storyboard, where everything is put in a series of scenes. The artists create visuals for the major scenes in the story including character poses, facial expressions, and backgrounds.
2. **Modeler:** The characters and the scenes are brought into existence by an animation modeler who builds three-dimensional computer models of the character, environment, hard surface models, and everything that is needed for a CGI project.
3. **2D animator:** After their modeling by modelers, the characters are then brought to life by the animators. 2D animators work on crafting flat images that have only width and height but don't have any depth.
4. **3D animator:** 3D animators add depth along with height and width to the character and its movements.
5. **VFX Artist:** Specializes in creating visual effects for films, TV shows, and commercials. They use software like Nuke, After Effects, or Houdini to create explosions, fire, water simulations, and other special effects.
6. **Rigging artist:** Rigging is a technique to add bones inside the body and bind it to the skin and a rigging artist is responsible for making a character believable and relatable by designing and maintaining a smooth and efficient rig.
7. **Compositors:** Compositors work at the end of the production procedure and build the final image by merging all the layers of previously created materials.
8. **Lighting artist:** The lighting artist works alongside the visual effects or digital animation team and is responsible for applying all lighting effects to a scene. This helps the character merge well with the background scene, which makes the animation look more realistic.
9. **Video game designer:** Video game designers develop video games for computers and gaming systems.
10. **Film and video editors:** They work at studios, broadcasting companies, advertising agencies, and similar organizations. These editors use specialized software to splice together frames from digital footage as they determine story pacing, sound effects, visual effects, and other characteristics.
11. **Art directors:** They oversee the work of animators, illustrators, graphic designers,

and multimedia professionals in television, film, advertising, and related areas.

12. **Web Developer:** Web developers focus on the design, creation, and maintenance of websites.

Who is an Advertising Professional?

Advertising professionals in India are individuals who are responsible for creating, planning, and executing advertising campaigns that promote products, services, or ideas. Their job is to develop a creative and effective message that will appeal to the target audience and persuade them to take action, such as making a purchase or changing their behavior. They work in various industries, such as advertising agencies, media companies, and marketing departments of organizations. Advertising professionals must have excellent communication, analytical, and creative skills to be successful in their roles.

The job of an advertising professional involves various tasks such as conducting market research, identifying the target audience, developing advertising concepts and strategies, creating advertising campaigns, managing budgets, and analyzing campaign performance. They work closely with other professionals, such as copywriters, graphic designers, and media planners, to bring their ideas to life. Advertising professionals must also stay up-to-date with the latest trends and technologies in advertising to ensure that their campaigns are effective and innovative.

Required Skills

If you have the following set of skills, then advertising is the perfect career choice for you!

- Excellent communication skills
- Story Telling
- Creativity
- Multi-tasking abilities
- Knowledge of Digital Marketing Techniques
- Presentation and management
- Team and leadership skills
- Stress and pressure management
- Persuasiveness
- Confidence and Competitiveness

What Can You Become In The Future?

A. Executive Division- The executive department looks after the needs of the client and manages them with the aim of retaining them. They also help the company find new clients.

- **Client Service Manager:** A Client service executive/manager acts as a medium of contact between external customers and internal departments for their agencies. A client servicing personnel will interact with clients and build relationships with them while ensuring their needs are being met, by interacting with their agency colleagues to resolve customer concerns.
- **Social Media Manager:** A Social Media Manager helps to increase exposure through social media platforms by working alongside a specialized team to reach the client's goals. Apart from attracting new customers, a Social Media Manager analyzes data to determine which initiatives work best and capitalize on this information to continue scaling their client's business through social media.
- **Account Analyst:** Advertising account analysts analyze various aspects of their clients' advertising campaigns, ensuring that clients achieve their advertising objectives. They usually analyze a number of different advertising metrics and may also make recommendations to clients based on their analysis.
- **PR Manager:** A Public Relations Manager (PR Manager) is a media and public relations professional who is responsible for planning and directing the creation of material that will maintain or enhance the public image of their employer or client.
- **Media Research and Planning:** The job responsibility of the media research and planning executives is to select appropriate media (TV, Print, or Radio) and record the placements and timings of advertisements. They also take care of the financial aspect of placing and sourcing and booking the advertisements that you see every day.
- **Business Development Manager:** Business development managers in an advertising agency are responsible for finding new opportunities and clients, researching leads, establishing relationships with potential clients, and arranging appointments for sales executives.

B. Creative Division- The Creative department, creates the ad copy (text, pictures, videos, etc. to go along with the ad) and takes care of the requirements of the client. Their job is to create the client's expectations and vision into a reality.

- **Copywriter:** Copywriters write the text to make an impact on the audience. They come up with a theme and a campaign slogan or write jingles or scripts that go along with the ad and are responsible for the production of all promotional literature for advertising the client's product. They also need to check final copies and remove all factual and grammatical errors and make sure that the text looks great.
- **Visualizer/ Graphic Designer:** A visualizer or a graphic designer is the creative counterpart of the copywriter, a digital artist who is able to interpret in visual terms the copywriter's ideas.
- **Photographer and Videographer:** The photographers and videographers in an ad agency do photo and video shoots for the client's products or services. They also edit those photos and videos.
